- 2 (03.10.2005) REGISTERED CHARGE dated 16 September 2005.
- 3 (24.02.2010) Proprietor: SANTANDER UK PLC (Co. Regn. No. 2294747) of Deeds Services, 101 Midsummer Boulevard, Milton Keynes MK9 1AA.

#### Schedule of restrictive covenants

#### Title number WYK7106

The following are details of the covenants contained in the Conveyance dated 8 June 1901 referred to in the Charges Register:-

"TO THE FURTHER INTENT that the areas between the building frontage line and the street and coloured green on the said plan shall for ever hereafter be kept open and unbuilt upon (except for bay windows steps sills and cornices) and be used as gardens or pleasure grounds only and the areas in the rear and coloured blue in the said plan shall be used as backyards only except that a kitchen or scullery with or without a bedroom or bathroom over and the usual convenience and ashpit may be erected in the backyard of each house AND the said Thomas Throup hereby COVENANTS with the said Charles Hezmalhalch Pounder and William Henry Saville that he the said Thomas Throup his heirs and assigns will forthwith at his own cost appropriate and set out and for ever hereafter continue appropriated and set out so much of the said plots of land hereby conveyed as is coloured green and blue on the said plan and will for ever hereafter keep the same open and unbuilt upon (except as aforesaid) and to be used in manner aforesaid.

AND that no building now or to be hereafter erected on the said plots of land or any part thereof shall be used for any noisy noisome or offensive trade or calling AND that the said Thomas Throup will at all times hereafter duly observe and perform the several intents hereinbefore contained and will at all times hereafter keep indemnified the said Charles Hezmalhalch Pounder and William Henry Saville and the said Oliver Hutchinson and Sam Shaw their respective heirs executors and administrators from and against all actions suits and proceedings which may be bought or prosecuted against them or any of them and against all loss costs and expenses in consequence of the future non observance or nonperformance thereof or of any of them respectively."

NOTE:-The front garden of the land in this title falls within the areas coloured green referred to. The back yard of the land in this title falls within the areas coloured blue referred to.

#### End of register

#### These are the notes referred to on the following official copy

The electronic official copy of the title plan follows this message.

Please note that this is the only official copy we will issue. We will not issue a paper official copy.

This official copy was delivered electronically and when printed will not be to scale. You can obtain a paper official copy by ordering one from HM Land Registry.

This official copy is issued on 06 September 2022 shows the state of this title plan on 06 September 2022 at 16:57:50. It is admissible in evidence to the same extent as the original (s.67 Land Registration Act 2002). This title plan shows the general position, not the exact line, of the boundaries. It may be subject to distortions in scale. Measurements scaled from this plan may not match measurements between the same points on the ground.

Reference number	

#### **About this form**

This form is completed by the seller to supply the detailed information and documents which may be relied upon for the conveyancing process.

#### **Definitions**

- 'Seller' means all sellers together where the property is owned by more than one person.
- 'Buyer' means all buyers together where the property is being bought by more than one person.
- 'Property' includes all buildings and land within its boundaries.

## Instructions to the seller

- The answers should be prepared by the person or persons who are named as owner on the deeds or Land Registry title or by the owner's legal representative(s) if selling under a power of attorney or grant of probate or representation. If there is more than one seller, you should prepare the answers together or, if only one seller prepares the form, the other(s) should check the answers given and all sellers should sign the form.
- If you do not know the answer to any question, you must say so.
   If you are unsure of the meaning of any questions or answers, please ask your solicitor. Completing this form is not mandatory, but omissions or delay in providing some information may delay the sale.
- If you later become aware of any information which would alter any replies you have given, you must inform your solicitor immediately. This is as important as giving the right answers in the first place. Do not change any arrangements concerning the property with anyone (such as a tenant or neighbour) without first consulting your solicitor.
- It is very important that your answers are accurate. If you give
  incorrect or incomplete information to the buyer (on this form or
  otherwise in writing or in conversation, whether through your
  estate agent or solicitor or directly to the buyer), the buyer may
  make a claim for compensation from you or refuse to complete
  the purchase.
- You should answer the questions based upon information known to you (or, in the case of legal representatives, you or the owner).
   You are not expected to have expert knowledge of legal or technical matters, or matters that occurred prior to your ownership of the property.
- Please give your solicitor any letters, agreements or other papers
  which help answer the questions. If you are aware of any which
  you are not supplying with the answers, tell your solicitor. If you
  do not have any documentation you may need to obtain copies at
  your own expense. Also pass to your solicitor any notices you
  have received concerning the property and any which arrive at
  any time before completion of the sale.

## Instructions to the buyer

- If the seller gives you, separately from this form, any information concerning the property (in writing or in conversation, whether through an estate agent or solicitor or directly to you) on which you wish to rely when buying the property, you should tell your solicitor.
- You are entitled to rely on the replies given to enquiries but in relation to the physical condition of the property, the replies should not be treated as a substitute for undertaking your own survey or making your own independent enquiries, which you are recommended to do.
- The seller is only obliged to give answers based on their own information. They may not have knowledge of legal or technical matters. You should not expect the seller to have knowledge of, or give information about, matters prior to their ownership of the property.

## 1. Boundaries

If the property is leasehold this section, or parts of it, may not apply.

1.1	Looking towards the property from the road to maintain or repair the boundary features		accepts re	esponsibility

The Law

Each seller should sign this form.

The Law Society is the representative body for solicitors in England and Wales.

#### Rules on letting this property

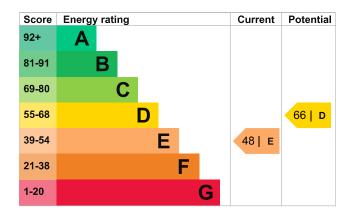

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance</u> for <u>landlords</u> on the <u>regulations</u> and <u>exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

## **Energy efficiency rating for this property**

This property's current energy rating is E. It has the potential to be D.

<u>See how to improve this property's energy</u> performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

#### Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Roof room(s), no insulation (assumed)	Very poor
Window	Mostly multiple glazing	Good
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer and room thermostat	Average
Hot water	From main system	Good
Lighting	No low energy lighting	Very poor
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, mains gas	N/A

#### Primary energy use

The primary energy use for this property per year is 391 kilowatt hours per square metre (kWh/m2).

#### **Additional information**

Additional information about this property:

· Stone walls present, not insulated

## **Environmental impact of this property**

This property's current environmental impact rating is E. It has the potential to be D.

Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.

Properties with an A rating produce less CO2 than G rated properties.

An average household produces

6 tonnes of CO2

This property produces	7.0 tonnes of CO2
This property's potential production	4.9 tonnes of CO2

By making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 2.1 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

#### Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from E (48) to D (66).

Step	Typical installation cost	Typical yearly savin		
1. Internal or external wall insulation	£4,000 - £14,000	£126		
2. Low energy lighting	£45	£53		
3. Heating controls (TRVs)	£350 - £450	£62		
4. Solar water heating	£4,000 - £6,000	£34		
5. Solar photovoltaic panels	£5,000 - £8,000	£257		

#### Paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/guidance/check-if-you-may-be-eligible-for-the-boiler-upgrade-scheme-from-april-2022)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Find energy grants and ways to save energy in your home (https://www.gov.uk/improve-energy-efficiency).

## Estimated energy use and potential savings

Estimated yearly energy cost for this property	£1553
Potential saving	£275

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The potential saving shows how much money you could save if you <u>complete each</u> <u>recommended step in order</u>.

For advice on how to reduce your energy bills visit <u>Simple Energy Advice</u> (<a href="https://www.gov.uk/improve-energy-efficiency">https://www.gov.uk/improve-energy-efficiency</a>).

#### Heating use in this property

Heating a property usually makes up the majority of energy costs.

## Estimated energy used to heat this property

Type of heating	Estimated energy used					
Space heating	18625 kWh per year					
Water heating	1926 kWh per year					
Potential energy insulation	savings by installing					
Type of insulation	Amount of energy saved					
Loft insulation	306 kWh per year					
Solid wall insulation	1969 kWh per year					

#### Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.

#### Assessor contact details

#### Assessment details

Assessor's declaration No related party
Date of assessment 11 January 2016
Date of certificate 12 January 2016

Type of assessment RdSAP

## **Electrical Installation Condition Report**

Requirements for Electrical Installations - BS7671:2018 (IET Wiring Regulations 18th Edition)

#### Information for recipients:

The purpose of this report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The report should identify any damage, deterioration, defects and/or conditions which may give rise to danger (see Section K).

The person ordering the report should have received the original report and the inspector should have retained a duplicate.

The original Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this report will provide the new owner / occupier with details of the condition of the electrical installation at the time the report was issued.

Where the installation incorporates residual current devices (RCDs) there should be a notice at or near the devices stating that they should be tested every 6 months. For safety reasons it is important that these instructions are followed.

Section D (Extent and Limitations) should identify fully the extent of the installation covered by this report and any limitations on the inspection and testing. The Inspector should have agreed these aspects with the person ordering the report and with other interested parties (licencing authority, insurance company, mortgage provider and the like() before the inspection was carried out.

Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.

For items classified in Section K as C1 ("Danger Present"), the safety of those using the installation is at risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.

For items classified in Section K as C2 ("Potentially Dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

Where it has been stated in Section K that an observation requires further investigation code FI the inspection has revealed an apparent deficiency which may result on a code C1 or C2 could not, due to the extent or limitations of this inspection, be fully identified. Such observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).

For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the report under 'Recommendations' and on label at or near to the consumer unit/distribution board.
